As a parent of children in the community I am noting our concerns about these camps.

There must be restrictive rules in place such as:

- At least 3000 feet from schools

- Do not share common walls, roads or access points

- Provide formalized police presence round the clock. (This takes away from other community needs)

- Max duration 30 days

- Not able to return to site for 24 months

Fundamentally I do not believe these camps should be near any schools. The cities should be working with state govt on formal not moving solutions that place these individuals away from children.

The criminal activity that takes place at these camps is not acceptable around our children.

I am requesting your commitments to keeping our children safe as the number 1 priority.
